HYDRAULIC HAMMER MANUFACTURERS SINCE 1975

Made In Italy

# About **italdem**:

*Italiademolitori srl* is the manufacturer *italdem* products one of the most well known brands of hydraulic hammers and one of the market leaders not only in Italy but also in many countries around the world. The current position is the result of **30 YEARS OF EXPERIENCE**.

# About *italdem*:

- *italdem* brand name include a comprehensive range of hydraulic hammers and other excavator attachments for excavators from 0,9 tons to 65 tons
- The production facilities in Bari/Italy are equipped with high quality standard machine tools, a skilled and experienced work force as well as constant and all-over quality control which has led to the ISO 9001 quality certification since 1999.

# Our huge Factory with state of the art facilities..

**With German made CNC machines And highly skilled engineers with years of experiences..**

**Manufacturing every part of our products in our factory, thus ensuring quality control in every process of manufacturing..**

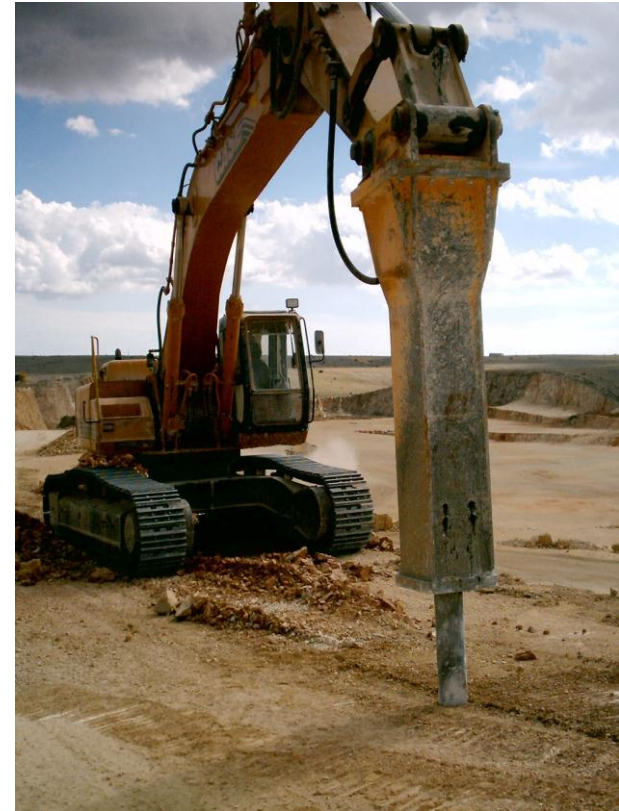

# So expect to get..

The highest level of quality products that are ready to work in the toughest working conditions, with guaranteed durability and low maintenance.

Available for all types of work  
From the Smallest application to  
the Biggest..

# Our Products..

## Hydraulic Hammers (New Series):

- The new GK Series Breakers offers the best solution for all kind of demolitions jobs and ready to work in the toughest conditions, the current production consists of 15 different models.
- The designing of a new series of hydraulic hammers is due to the new necessities that have come along in these years from the new technological advanced excavators and from the hydraulic hammer market demand.
- In our new breakers series we re-designed the hydraulic hammers increasing hydraulic efficiency, number of blow, and oil discharge force in order to compete with higher back-pressures

# Advantages of our breakers..

- HIGH ENERGY OF THE BLOW: a lighter hammer will do the same job – save gas consumption and stress on carrier.
- ITALDEM ® ' s HSC system (Hydraulic System Control) increases automatically the number of blows and the blow energy, if the rock changes from soft to hard.
- The size of the models ranging from a minimum of 19 kg to a maximum of 4000 kg allows "ITALDEM" hammers to be fitted on excavators from 0,5 to 60 tons.

## Advantages of our NEW breakers..

- The hydraulic hammer starts working with low pressure (about 40 bar) and with little energy, this permits to work on walls to level and avoid empty blow.
- The carcass has been re designed. We have reduced drifts, gaps and vibrations which were causes of high noise.
- Optimizing the courses, piston velocity and hydraulic efficiency, we gained a higher number of blow which means more productivity.

# Crusher Bucket

- ITALDEM's revolutionary new crushing method which requires no more expensive crushing plants. An excavator mounted bucket, big enough to include a small jaw crusher, driven hydraulically like any other hydraulic attachment.
- Two models are available: a 3,5 ton crusher bucket GF 35 for 20 to 25 ton excavator and a 4,5 ton crusher bucket for bigger excavators.

# Screening Bucket

- The screening bucket GV 1500 is an innovative attachment which is of great help for the screening of various types of materials, such as pebbles or materials from demolition jobs, for the reclamation of soils or beaches.
- The GV 1500 works with the hammer circuit and suits excavators from 13 to 25 tons.

# Sheers & Pulverizers

- Being manufacturer of hydraulic breakers of over 30 years , we are now offering a comprehensive range of new equipment for all kind of modern demolition challenges with maximum reliability and durability.

# Spare Parts

We are specialized in the production of spare parts for Other Brands of Breakers in the Market such as MONTABERT, ATLAS, FURUKAWA, RAMMER, KRUPP, RINHO, SOCOMEC, HAN WOO, NPK, OKADA ,etc.

Our Spare Parts are always available on stock and ready for delivery.

# What do we offer..

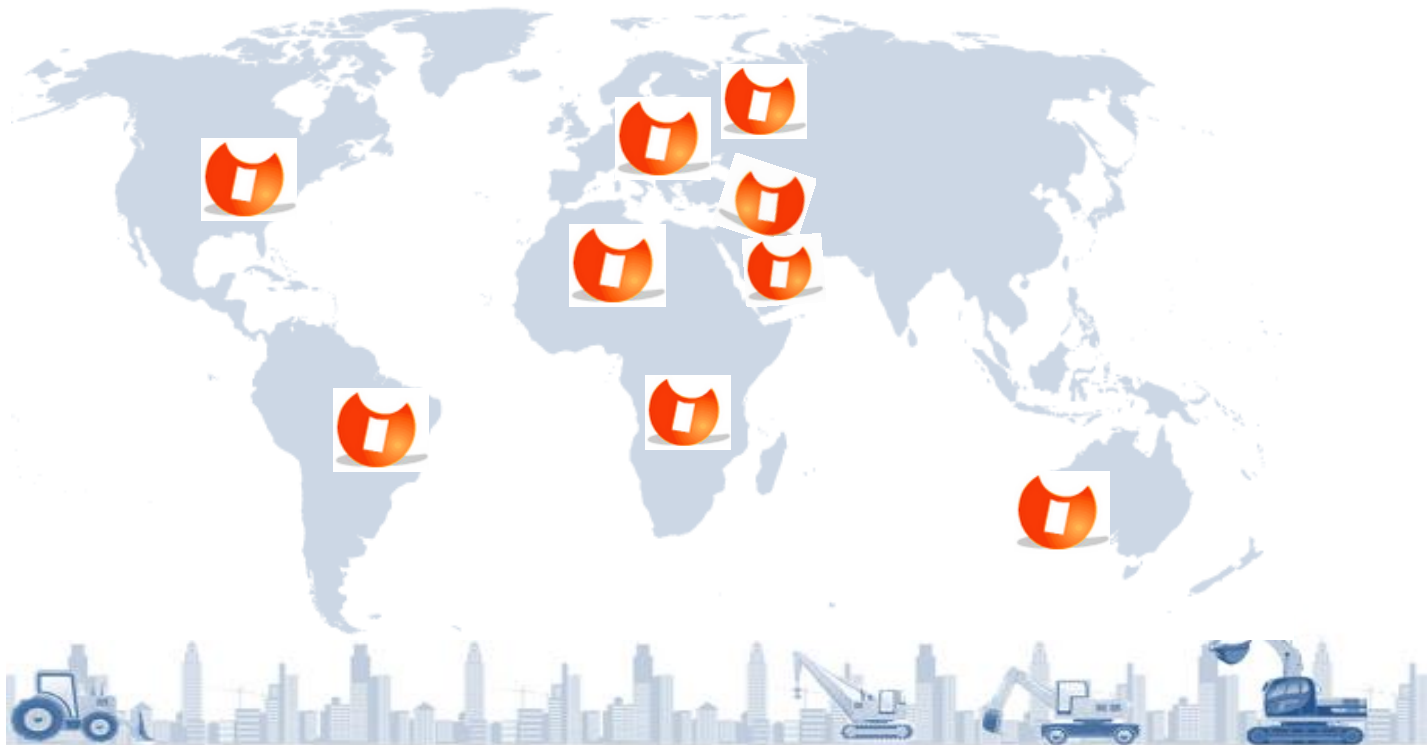

- Great Discounts offers for our dealers and clients with discounts up to 55% on all the products and 50% on the Spare Parts.
- 1 Year Warranty on all of our products from the date of delivery to end user.
- All ITALDEM ® hammers are immediately available: 2 to 3 days from order date for all models and up to one week for all bigger models.
- Organizing the shipment process with the lowest possible cost.
- Possibility of customization of different color and logo if requested.
- Superior after sales services for our clients with easy communication with our skilled and multilingual team in the sales and export department (Italian, English, Arabic, , French and Spanish)

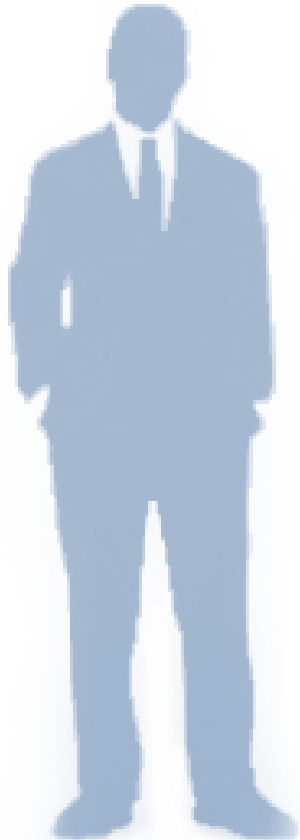

# Our Clients:

We are proud to have supplied our products to clients from all over the world from small and middle sized companies and even individuals to well known international corporation who all seek top quality products.
